

BG-24 | Digital Wireless Microphone Receiver

Description

BG-24 is a newly launched 2.4G digital wireless microphone system from the Relacart MIPASSPORT series. The appearance is simple and elegant, made of strong and durable alloy; the high-brightness OLED display can clearly display the working status of the device. Optional handheld microphone wireless charging base makes charging management more convenient; it uses ISM's global unrestricted 2.4GH frequency band for transmission and can be used in any area. Relacart independently develops digital audio algorithms, allowing the host to have ultra-low latency transmission; it is fully suitable for small and medium-sized performances, business negotiation venues, conference rooms, schools, home entertainment and other occasions.

Product Specification

Wireless carrier frequency :	2.4 GHz
Audio sampling rate:	48KHz 24-bit
Frequency response:	20Hz-20kHz
low latency:	≤3ms
dynamic range :	≥110dB
Wireless format:	Relacart proprietary digital audio format
