

CS-501D | Delegate Unit

Description

The CS-501D conference system microphone adopts a super directional capsule that can capture the speaker's voice clearly and reduce environmental noise, allowing everyone to hear the speech clearly. At the same time, the microphone uses a Cat5 network cable for connection, and is powered by the conference system central controller, no additional power supply required and is easy to install. In terms of appearance, the CS-501D uses a metal shell that is durable and sturdy, with a simple yet industrial design that can complement various conference room styles and bring a more professional image to the enterprise. The product design also considers ease of operation, allowing you to focus more on communication during the meeting, rather than wasting time on complicated settings.

Product Specification

Polar pattern:	Cardioid Condenser
Frequency response:	50Hz-20KHz
Sensitivity:	-20dB+/-3dB(0dB=1V/Pa, f=1KHz)
Maximum input sound pressure level:	110dB(THD < 5%, f=1KHz)
Signal to noise ratio (A weighted):	> 100dBA (THD < 1%, f=1 KHz)
Distortion:	< 0.1%
Power supply:	24V DC(supplied by the receiver)
Power consumption:	0.72W
Unit interface:	Cat5 typeB network port
Weight:	about 670g
Dimension (mm):	147 (L) x115 (W) x218 (H)
