

TM-500

Dual Channel Wireless Receiver

Description

TM-500 is a true diversity wireless receiver developed by Relacart independently. It can be used with an external frequency controller that can synchronize the microphone automatically, and it can be connected to the central controller, and has returning pages and cascade function.

Product Specification

Receive Bandwidth:	521.25MHz ~ 936.85MHz
Receiving Method:	FM super heterodyne true diversity reception
RF Sensitivity:	5dBv, S/N≥60 dBat 25KHz deviation
Squelch Adjustment:	Set
Frequency Synchronization Method:	IR Sync
Maximum Output level:	Maximum output + 11dBV
Output Level Adjustment Range:	Set
Power Supply:	DC12V / 1A
Normal Working Current:	DV12V, 330mA
Dimensions(mm):	410 (W) ×206(D) ×43 (H)
Net Weight:	1.8kg
